

Recommendation

We recommend Doubleblade Derinding Machine C560 DBD produced by NOCK Maschinenbau GmbH as a device fully satisfying our requirements regarding work (skinning and defatting – that means simultaneous taking off part of fat), quality (both technologically in taking off skin without fat content and taking off fat, as well as the quality of the device's performance) , maintenance friendly (within the requirements of technical, service and production) and prices.

Yours faithfully,

Dominik Chamarczuk

Plant Manager
